Change the graphic banner

Roll the old banner out of the cassette and insert the locking pin.

Slide the banner out

Tension adjustment

If adjustment is needed, hold the cassette firmly in place then depress and turn the adjusting screw clockwise to increase the tension (the tension mechanism adjusts in halfturn increments). Slowly release pressure on the screw turning slightly counter-clockwise and allow it to again lock in place. If tension has been lost completely, we recommend 20-25 full clockwise turns.

All cassettes are pretensioned before delivery.

Mount the banner rails

Mount the bottom rail on the reverse side of the banner.

Mount the snap rail on top of the banner.

Close the rail.
